---

8. KEYWORD CANNIBALIZATION PREVENTION STRATEGY

Geographic Keyword Distribution:

- **County-level**: "Bucks County" keywords on homepage and main service pages

- **City-level**: Specific city names only on dedicated city pages

- **Township-level**: Township names only on dedicated township pages

- **Neighborhood-level**: Neighborhood names only on dedicated neighborhood pages

Service Keyword Distribution:

- **Main services**: Broad terms on primary service pages

- **Industry-specific**: Industry + service combinations on industry pages

- **Problem-solving**: Question-based keywords on problem/solution pages

Content Type Keyword Distribution:

- **Commercial**: Service pages target commercial intent keywords

- **Informational**: Blog and resource pages target informational keywords

- **Local**: Location pages target geo-specific keywords

- **Branded**: About/contact pages target branded keywords

Internal Linking Strategy to Prevent Cannibalization:

1. **Hub and Spoke Model**: Main service pages link to all related sub-service pages

2. **Geographic Silos**: Location pages only cross-link to nearby locations

3. **Service Silos**: Service pages link to related services but not competing keywords

4. **Content Attribution**: Each page has one primary keyword focus with supporting secondary keywords

This comprehensive sitemap ensures complete coverage of the Bucks County market while maintaining clear keyword separation and optimal internal linking structure for maximum SEO effectiveness.
